## Orange and Telecom FL start to offer UMTS and HSDPA in the Principality of Liechtenstein

**This summer, Orange and Telecom FL will begin offering UMTS and HSDPA mobile broadband technology in the Principality of Liechtenstein. Mobile broadband internet, fast music downloads and numerous other mobile phone services will also be available soon to customers in Lichtenstein.**

This summer, the Orange UMTS and HSDPA network will cover the area between Balzers and Schaanwald and coverage will be continually expanded. As a result, Orange and Telecom FL clients will benefit from the UMTS and HSDPA offers.

UMTS/HSDPA mobile phones and laptop data cards will enable an internet connection speed of up to 384 Kbit/s or 1.8 Mbit/s. This means that it will be possible to have a mobile internet connection that is faster than a connection established by a current basic ADSL fixed line.

Orange and Telecom FL have maintained a close co-operation since 2005. The introduction of mobile broadband services with UMTS and HSDPA is another milestone as a result of this co-operation. The UMTS and HSDPA footprint demonstrate Orange's continued commitment in the Principality of Liechtenstein.
