

Orange offers new iPhone 3G S and launches Internet Everywhere for mobile

The iPhone 3G S is available in 58 Orange Centers throughout Switzerland as of today from as little as CHF 29.- with 16 GB or CHF 149.- with 32 GB. The iPhone 3G 8 GB is available from CHF 1.-. At the same time, Orange is launching Internet Everywhere for mobile, a price plan for surfing the Internet on the move with a laptop using the iPhone 3G or another mobile phone as a modem.

The new iPhone 3G S features faster data speeds and improved performance. With its longer battery life, the iPhone 3G S gives you more time to listen to music, surf the Internet or get on with your work.

One of the 100-plus new features the new iPhone OS 3.0 software offers is Internet Tethering, which allows you to use the iPhone 3G as a modem to connect your laptop or PC to the Internet. Orange's HSDPA mobile broadband technology enables data rates of up to 7.2 Mbit/s, so surfing on the move is very comfortable.

As a special offer until the end of this year Orange allows the iPhone customer to use the tethering functionality for free and without any additional costs within the limits of the included data volume of the iPhone price plans (1 000 MB). All data connections will be deducted from the included data volume. Data traffic that exceeds the included data volume of 1 000 MB per month will be charged with CHF 0.10 / MB.

Internet Everywhere for mobile

While some people prefer to use a USB modem for broadband Internet surfing on the move, others don't want to buy any additional hardware. Since most of today's mobile phones support a modem function, Orange is now offering Internet Everywhere for mobile:

Option	Internet Everywhere for mobile	Internet Everywhere Young*** for mobile
Surfing*(CHF)	Included	Included
Data volume**	Unlimited	Unlimited
Basic monthly fee (CHF)	49.-	39.-

*Valid on the Orange network in Switzerland. Higher charges apply for using Internet Everywhere outside Switzerland.

**If your data volume exceeds 5 GB a month, Orange reserves the right to restrict your data speed in order to ensure an equal quality of service for all customers.

***Only for customers under 27 or students.

You can find more information on the iPhone 3G S and Internet Everywhere for mobile from Orange at www.orange.ch. For further information on the iPhone 3G S, see www.apple.com/iphone.
