Now available from Orange: the new Nokia Lumia 800

The Nokia Lumia 800 is the new flagship product in Nokia's range of smartphones. The Nokia Lumia 800 is a convincing handset across the board - no other smartphone makes quite the same impact in terms of strikingly elegant design, performance capabilities and range of functions. Its integrated communications processes mean that Facebook, Twitter, etc., and multimedia services are clearly laid out and simple to use. Fast Internet browsing is a dream, as is working with Outlook, Word, Excel, OneNote, Powerpoint or PDF. The new Nokia Lumia 800 is now available in the fashionable colours cyan and black.

Thanks to its novel operating system, using the Nokia Lumia 800 is easy and intuitive. Its tactile multi-touch screen enables users to navigate the device smoothly and quickly, while the 480 x 800 pixel resolution and OLED technology guarantee vibrant colours, pin-sharp images and excellent contrast ratios.

The Nokia Lumia 800 also caters for fast mobile browsing with inbuilt HSPA technology (permitting theoretical connection speeds of up to 14.4 and 5.76 Mbit/s). Orange offers the fastest data network of all for smartphones – as was demonstrated in the large-scale network test conducted by the renowned journal *connect* (please see the [press release of 01.12.11](#) and www.connect.de). WiFi Internet access is of course also possible with the new smartphone flagship.

It also handles the many apps, Nokia Drive and maps, entertainment services, Office applications and many other functions with great speed and ease. The built-in 1.4 GHz processor by Qualcomm and 512 MB RAM memory really come into their own here.

A high-quality camera rounds off the package. With 8 megapixel resolution and Carl Zeiss optics including auto focus and flash, shooting great photos and HD videos is child's play.

Of course the Nokia Lumia 800 also provides top standards for phone calls. HD Voice capability means this stylish Finnish smartphone offers optimal voice quality – a feature unique to Orange throughout Switzerland since October 2011 (please see the [press release of 14.10.2011](#)).

Information on Nokia Lumia 800 prices and availability as well as further details on the range of functions and services can be found at the [Orange Online Shop](#) as well as on www.orange.ch/nokia.
